### Short description of PUBLIC AUCTION PROCEDURE

Capital selling by public auction is carried out by Auction Commission established by the Privatization Agency. The Commission monitors auction sale, registers auction participants, announces auction unsuccessful, signs the minute and does other important jobs for auction process according to the law. The conditions for auction implementation are fulfilled if at least one person is given the auction participant status, if he is personally present or through his official accredited representative.

At time ordered for the start of PUBLIC AUCTION, auctioneer will open the first bidding where the means of payment can be in cash or due bonds. If there are many persons at the first bidding, the auctioneer announces initial price as well as each further increase. In case that none of the interested buyers react after the third call for accepting newly established price, the auctioneer, by hammering, declares the auction finished. Selling price becomes the highest offered value, and the participant who has been the first to offer the highest price is declared a buyer. If after the announcement of the initial price nobody is interested even after the third call, the auctioneer declares the first bidding unsuccessful and immediately opens the second bidding where even unmatured bonds can be the means of payment. Those who have applied for the second bidding can participate in it, as well as the participants in the first bidding if it has been unsuccessful.

If there are many participants in the second bidding the auctioneer announces initial price as well as each further increase. If none of the interested buyers react after the third call for accepting newly established price, the auctioneer, by hammering, declares the auction finished. Selling price becomes the highest offered value, and the participant who has been the first to offer the highest price is declared a buyer. If after the announcement of the initial price nobody is interested even after the third call, the auction is declared unsuccessful, and the participants lose the right to be brought back the deposit.

If only one person who has been given auction participant status attends the second bidding, that person is called three times to accept initial price. If he accepts the initial price, he is declared a buyer, and the initial price becomes selling price. If the participant doesn't accept the initial price, the auction is declared unsuccessful, and he loses the right to be brought back the deposit.
