## Brief description of the PUBLIC AUCTION PROCEDURE

The sale of the capital by method of the public auction is carried out by the Auction Commission, which is established by the Privatization Agency. The commission supervises the capital sale by the auction, registers the auction participants, pronounces the auction for unsuccessful, signs the minutes and performs other activities of importance for the auction performance in accordance with the Law. The conditions for the auction to be carried out are met, if at least one person has obtained the status of the auction participant and if it is presented personally or by an authorized representative. At the time ordered for the PUBLIC AUCTION opening, auctioneer shall open the first bidding, on which occasion the means of payment can be in cash or due bonds. If there is more than one person at the first bidding, the auctioneer announces the initial price as well as each further increase. In case that none of the interested buyers reacts after the third call for acceptance the newly established price, the auctioneer

declares the auction finished by hammering. The selling price becomes the highest offered value, and the participant who has been the first to offer the highest price is declared a buyer. If there have not been interested parties after the announcement of the initial price, even after the third call, the auctioneer declares the first bidding unsuccessful by hammering and immediately afterwards opens the second bidding, on which occasion even undue state bonds can be the means of payment. Those who have applied for the second bidding can participate in, as well as the participants in the first bidding, in case it has been declared unsuccessful. If in the second bidding participate more than one person, the auctioneer announces the initial price, as well as each further increase. If none of the interested buyers reacts after the third call for acceptance the newly established price, the auctioneer, by hammering, declares the auction closed. The selling price becomes the highest offered value, and

the participant who has been the first to offer the highest price, is declared a buyer. If after the announcement of the initial price there have not been any interested parties even after the third call, the auction is declared unsuccessful, and the participants lose the right to be brought back the deposit. If only one party who has been given the auction participant status attends the second bidding, that party is invited three times to accept the initial price. If she/he accepts the initial price, she/he is declared a buyer and the initial price becomes the selling price. If the participant does not accept the initial price, the auction is declared unsuccessful, and she/he loses the right to be brought back the deposit.
