### Brief Description of PUBLIC AUCTION Procedure

The sale of share by public auction is carried out by the Auction Committee established by the Privatization Agency and the Share Fund. The Committee supervises auction sale, registers auction participants, declares auction unsuccessful, signs the minute and performs other activities important for auction performance in accordance with the Law. The conditions for auction to be carried out are fulfilled if at least one person has obtained the status of an auction participant and if it is presented personally or by an authorized representative. At the time ordered for the PUBLIC AUCTION opening, the auctioneer shall open the first bidding.

If there is more than one person at the first bidding, the auctioneer announces the initial price as well as each further increase. If there have not been interested parties after the announcement of the initial price, even after the third call, the auctioneer declares the first bidding finished. The selling price becomes the highest offered value, and the participant who has been the first to offer the highest price is declared a buyer. If after the announcement of the initial price there have not been any interested persons, even after the third call, the auction is declared unsuccessful, and the participants lose the right to be returned the deposit.

If only one party who has obtained the auction participant status attends the second bidding, that party is invited three times to accept the initial price. If the party accepts the initial price, she/he is declared a buyer and the initial price becomes the selling price. If the participant does not accept the initial price, the auction is declared unsuccessful, and she/he loses the right to be returned the deposit.
